

Interactive Visual Ideas & Concepts

DES 427 - Project 1 Interactive Visual Items

Zainab Islam

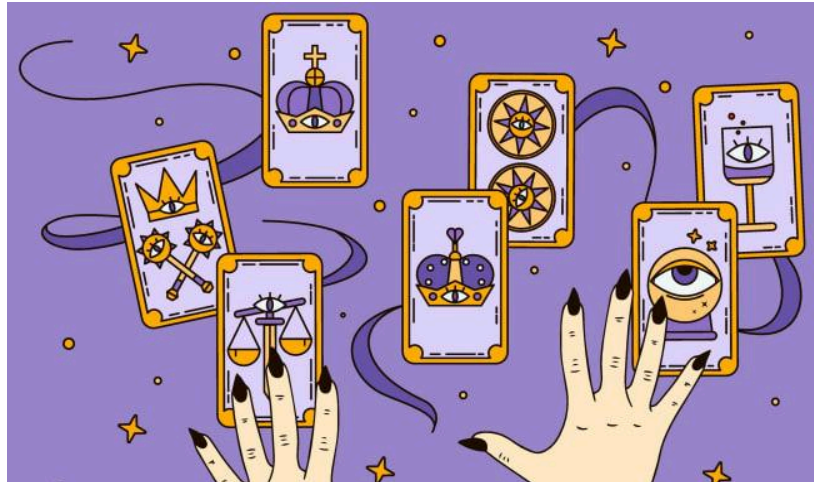

Walk your alien: Walk your pet alien around your neighborhood. Alien(rounded square with color and features)can move across the screen (background city). Navigate with keypresses. Potential unexpected events when mouse pressed.

Moodboarding/Graphics:

Magic Shop: Draw cards from a psychic reading. Spooky, mysterious, magical background. Face-down cards on display. When clicked they flip face forward to reveal image or text. Shuffle (double mouse press or key press) to randomize again.

Moodboarding/Graphics:

Character Customizer: Create your own (super low-poly or minimalist art style) character. Click on random parts to start a carousel (array) of features, double click to stop (selects that feature). For example different hairstyles, different eye shapes, different clothes – almost like a bad snapchat filter. Button at the bottom to reset.

Moodboarding/Graphics:
